Predictive Oncology (NASDAQ: POAI) Featured in NetworkNewsWire Publication Discussing Power of Data Plus AI in Precision Medicine

October 30, 2019

NEW YORK, Oct. 30, 2019 (GLOBE NEWSWIRE) -- via NetworkWire —**Predictive Oncology (NASDAQ: POAI)** today announces its placement in an editorial published by NetworkNewsWire ("NNW"), a multifaceted financial news and publishing company for private and public entities.

To view the full publication, titled "Delivering Precision Medicine's True Potential: Big Data, Artificial Intelligence Identify New Cancer Therapeutics," visit: http://nnw.fm/gv2Sr

The field of precision medicine has latched upon what may well be the Holy Grail in the fight against cancer. When big data are utilized by teams of pathologists, data can be incredibly helpful, but when the right data are comprehensively analyzed by artificial intelligence (AI)-powered models, the data can be downright lifesaving.

Predictive Oncology (NASDAQ: POAI) is in an enviable position in the precision-medicine industry due to its incredibly rich data set of more than 150,000 clinically validated cases on its molecular information platform, with 30,000-plus specific to ovarian cancer. The company is leveraging this unique database through Artificial Intelligence to provide the actionable insights needed to drive pharma R&D programs and improve patient outcomes. A data asset like this typically takes at least five years to fully validate and most competitors are only in the early stages of the process. Predictive Oncology already has it.

About Predictive Oncology Inc.

Predictive Oncology is an AI-driven company focused on applying artificial intelligence to personalized medicine and drug discovery. The company applies smart tumor profiling and its AI platform to extensive genomic and biomarker patient data sets to predict clinical outcomes and, most importantly, improve patient outcomes for cancer patients of today and tomorrow. Predictive Oncology currently has approximately 150,000 clinically validated cases on its molecular information platform, with more than 38,000 specific to ovarian cancer. The company's data is highly differentiated, having both drug-response data and access to historical outcome data from patients. Predictive Oncology intends to generate additional sequence data from these tumor samples to deliver on the clear unmet market need across the pharmaceutical industry for a multi-omic approach to new drug development.
